

Group ESPI, created in 1972, is a private higher education school like no other for its education offer specifically destined to real estate occupations.

Its programs are registered in the National Repertoire of Professional Certifications (RNCP), as “Real Estate Business Management” Bachelor degree, level 6 State-admitted degree, and as master’s degree (five specialities) with four level 7 State-admitted degrees and one school certification.

Group ESPI’s 3.200 students are split up in the campuses of Paris, Nantes, Marseille, Bordeaux and Lyon, and the branch of Montpellier, to train them to tomorrow’s real estate.

Group ESPI pursues its developments which are part of an academic dimension of excellence. To do so, the Group acquired a strategic road map entitled “PARADIS” (Partnerships, Academic, Research, Continuous Improvement, International Development, Standardisation). Here, the internationalisation of our activities, to whom our corporate governance pays particular attention, is a priority axis of the Group.

The regularly documented expectations of our students, academic partners and research players, the needs expressed by real estate companies highlight the imperative necessity of pursuing and strengthening the internationalisation and modernisation of the Group and its process, which are appreciated and encouraged.

In order to strengthen our international positioning (among French and European schools in particular), to enjoy reinforced visibility, attractiveness and readability of our international activities, several goals have been set:

- Pursue and strengthen the internal accumulation of our “our daily internationalisation” communities and strengthen the learning of languages, and cultural openness
- Develop our international academic partnerships
- Develop in & out mobilities for all of our communities
- Develop educational products destined to the international
- Professionalise and reinforce our international communication

Today, our students can enjoy some twenty international academic programs (double degree, exchange programme) with more than fifteen destinations. We have created, from Autumn 2021, a program entirely taught in English during the 3<sup>rd</sup> year. We encourage all our students to live an “international experience” which gives them the opportunity to acquire skills as a matter of language, culture and profession. As many ways to encourage the internationalisation of our communities, of their habits...

Group ESPI’s participation to ERASMUS + 2021 2027 program is a fundamental element in the pursue of our institutional strategy’s deployment, in the improvement of our international positioning, for our modernisation and the internationalisation of our practices.

Thanks to ERASMUS + program, the aim will more particularly be strengthening and developing our international cooperations (identification of target territories and schools and signatures of new academic partnerships), developing student and staff (academic and administrative staff) mobilities, and professionalising and adapting especially our mobility tools (by taking into account the challenges of distance learning and working and a better use of languages) and more generally our communication to these ends.
